Unparalleled Developments

FOR .ALL!

Never before in the history of real estate operations in Southern California has a tract of land been developed so successfully and rapidity as that at ETIWANDA.

The reasons for this remarkable success have been found in the liberal management of the proprietors in putting everything in first-class shape for a home for those who have means to surround themselves with the luxuries as well as the necessaries of life, and at the same time engage in a business that yields large profits in return for intelligent labor. First WANDA water supplies of finite developed from 5,500 to 5,000 acres of land. It is based on one inch of water under a four inch pressure to eight acres of land—the water to be measured on the 15th of July.

The owners of land own and control the Company that owns the water, and hence the consumer gets his water at cost. Each stockholder is entitled to his pro rata of water, and there can never be any disputes about how much water.

be established.

During the dull portion of the season sales have been numerous on this tract. Already nearly one thousand acres have been sold, and next winter several hundred acres of the tract will be planted to orchard and vineyard.

Public confidence was never stronger in any tract than this; no one questions either the quality of the soil or the reliability and complete system of the water supply. uality of the soil or the reliability and com-olete system of the water supply.

The price of land from the very first has been seld firmly at \$100 per acre, at which price a imited amount of land will still be sold before in advance is made.

The proprietors desire to sell at least 2,000 gress more before the summer of 1883, and from present indications this task will be any easy into the self-self price of location.

Chaffer Brothers will erect a school house at once and have a public school open prior to lanuary 1.

Innury I.

A telephone line has been put up connecting ETIWANDA with the telephone system of San Bernardino county, which places this tract on speaking terms with San Bernardino, Colton, Riverside and Redlands.

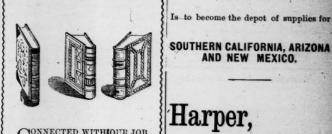

A lithographic sketch of the tract, together with a map of the laids sold and to be sold accompanied by a more's complete description of the lands, will be furnished on application at any time after August 20th.

A couple of letters from leading merchants—and very well-written letters they are too, judged from their writers' own standpoint—taking strong ground in favor of the existing railway management, and attributing the present prosperity of Los Angeles to its pressure and policy, are published in the same issue of our Democratic cotemporary, with approving comment. The letters are by the Messrs. H. Newmark & Co., and Hellman, Haas & Co. The latter firm appulls through; that there is no chance for the same issue of man, Haas & Co. The latter firm appulls through; that there is no chance proves almost without qualification, the freight-traffic policy of Mr. Stubbs, gressmen have a noor show, as Sumner which is the subject of so fierce and bitter assaults by Mr. Hearst's newspaper. The firm referred to think that the contract system is a very good thing. It may be for those merchants who are fortunate enough to have the benefit of it. But what about those unfortunates who have no contracts, and who are persistently "cinched" by the monopoly if they make a single moves toward obtaining freights by any other means of transportation than the an racts, and who are persistently ing to make a campaign winning without lots of money. Verily, the railway company could Verily, the railway company could ask no more than this! It is precisely them don't know how to manage. To what they are contending for, and hear the old heads here talk of the way the language here used is substantially that of Mr. Manager Stubbs in his blind Buckley and his sort say of the that of Mr. Manager Stubbs in his numerous letters to the Examiner (which paper, by the way, is excluded from the trains of this paternal corporation, to which, according to the Herald and its brother apologists, we are indubted for all the prosperity this county and section are now enjoying.) The one claim which the grasping corpoclaim which the grasping corporation, through its spokesmen, Messrs.

Stanford, Stubbs, et als., has pressed more persistently than any other through all these years since the battle with it began, is its claim to the right in the tright tright in the tr with it began, is its claim to the right of managing its own business to suit itself, without regard to equity, law, public opinion or private protest. How does all this accord with our cotemporary's support (it is only a half-hearted support, however), of Stoneman, the great North American anti-monopolist and railroad pass-taker?

We think we see a smile illuminating the countenances of the populace.

We think we see a smile illuminating the countenances of the populace when they contemplate the situation.

The new postal money order bill promises to be a measure of real convenience to the public. Orders for less than \$5 will cost three cents, and the service is extended so as to raise the service is extended so as to raise the fill out a blank, as at present, for an order, but will receive an order payable to the bearer at the money order office designated by the applicant. The new notes are to be handsomely engraved, and in appearance will not be unlike bank notes.

A constructors increase is noted in the importation of foreign wares into this country. The entries for drygoods alone for July, at New York, foot up \$11,870,040.

The new host is in the populace twist they intend to do. The Deliverance League have scratched two or three of the candidates for hirring Chinamen, and the Freedom League don't appear to be satisfied with Stoneman and other men on the ticket.

It does seem to be the worst mixed affair I ever know here in San Francisco, and by all accounts the country to a good deal in the same condition, as concerns the general result. I have not talked with a Democrat that is posted who feels confident of success, and I have heard a good many who asy they are ready to give it up as another bad job.

Difficulties of Bathing.

cor. Cincinnati Enquire...

There is less change perhaps in bathing dresses than in any form of costume worn by women, and there ought not to be any at all. It should be very easy to make a dress suited to so simple a purpose, and then it should be adhered to without attempting change or alteration. The attempt is usually made to bring American ideas, in regard to bathing-dresses, nearer the European standard, and this may well be done in regard to the good cut and shapeliness of the garments, but the absence in this country of bathing machines, which run down into the water and enable the bather at the seaside resort abroad to step from her box into the water, is sufficient reason why the sleeves and trousers of our women's bathing-dresses should maintain their standard of length.
